This list follows the taxonomic order of The American Ornithologists' Union Check-list of North American Birds, 7th edition, with changes through the 50th Supplement, August, 2009.

Bars indicate relative abundance of species during each month of the year. Column headed N indicates a nesting record in Breeding Bird Atlas of Contra Costa County.

Habitats: A = Aerial (associated with habitat listed); B = San Francisco or Suisun Bay; C = Chaparral, brushland; E = predominantly in East County; G = Grassland, savannah (grass with scattered oak); K = Cliffs and rocky areas; M = Marsh, mudflat and shores; O = Open water of rivers, lakes and reservoirs; R = Riparian; W = Woodlands; U = Urban, suburban and city parks.

Abundance:

Can usually be found on a field trip in the appropriate habitat and season. Easily seen or in large numbers.

Occurs regularly in the appropriate season, but in fewer numbers.
 Uncommon species, or secretive species that seldom reveal themselves.
 Occasional, irregular, but a few seen almost every year.

Individual sightings of casual or accidental species.

Checklist of the BIRDS OF CONTRA COSTA COUNTY Mount Diablo Audubon Society May 2010 ©

This is a revision of the Checklist published in September 1982, which was prepared by the Mount Diablo Audubon Society Bird Population Study Committee: Sally Steller, Norah Bain, Elizabeth Dickey, Lynn D. Farrar, Tom Lee and Jean Richmond. We are grateful for their pioneering data compilation and evaluation, without which this edition would not be possible. The current work was coordinated by Paul Schorr, Jimm Edgar, Denise Wight, Maury Stern, Hugh Harvey and Steve Glover; design and preparation for publishing by Ellis Myers. California Quail illustration by Harry Adamson; Feather by Dana Gardner.
